

Clear the config of the NVS

Sometimes customer may need to clear the config of the NVS (e.g.:when you forget the password, you can set the username and password to default)

A、telnet the NVS

B、Input

User name:**root**

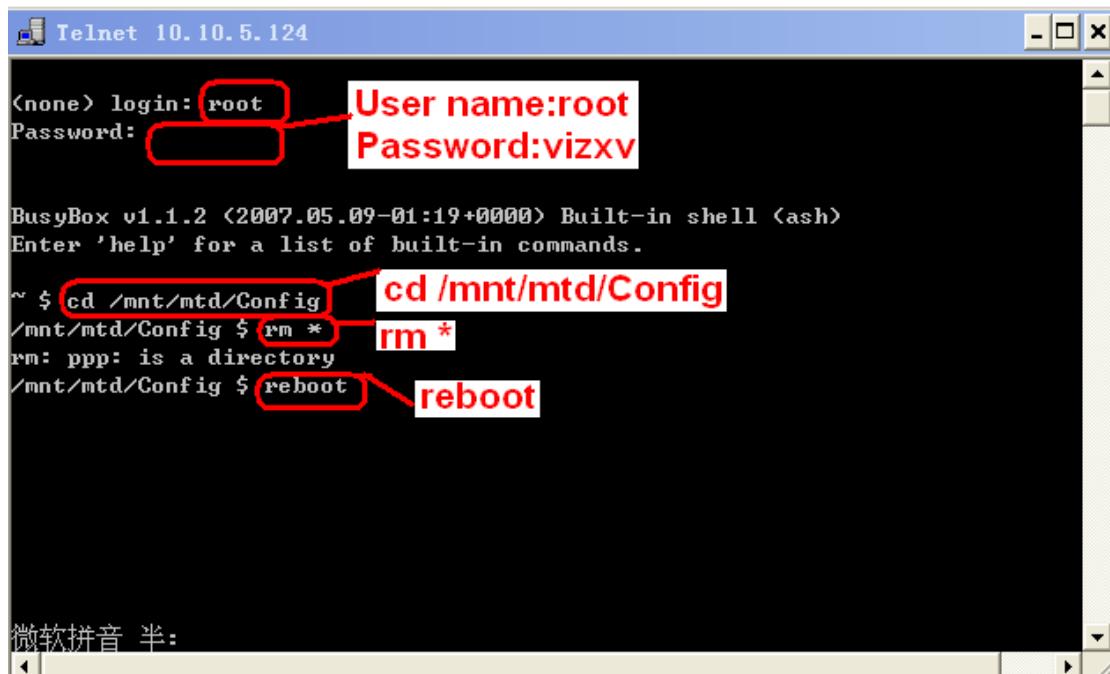

Password:**vizxv** or (without any password)

C、Then you will get **~\$** directory,

Input **cd /mnt/mtd/Config** to enter the **Config** directory

Input **rm *** to clear the old config

Input **reboot** to restart the DVR

The screenshot shows a Telnet session window titled "Telnet 10.10.5.124". The session starts with a login prompt: "login: root". The user inputs "root" and "vizxv" respectively. The screen then displays a BusyBox shell with the version "BusyBox v1.1.2 <2007.05.09-01:19+0000> Built-in shell (ash)". It includes a help message: "Enter 'help' for a list of built-in commands.". The user then enters the command "cd /mnt/mtd/Config" to change to the configuration directory. Inside this directory, they run "rm *" to remove all files. A note indicates that "rm: ppp: is a directory". Finally, the user runs "reboot" to restart the device. The bottom of the window shows a status bar with "微软拼音 半:".

D、The NVS user name and password will become to default value: **admin**
