# Redundancy Setting

Redundancy is similar to Raid1 or mirror recording, that means you can record the video double to 2 different HDDs (working HDD and redundancy HDD), if one HDD was broken , you can find recordings from redundancy HDD
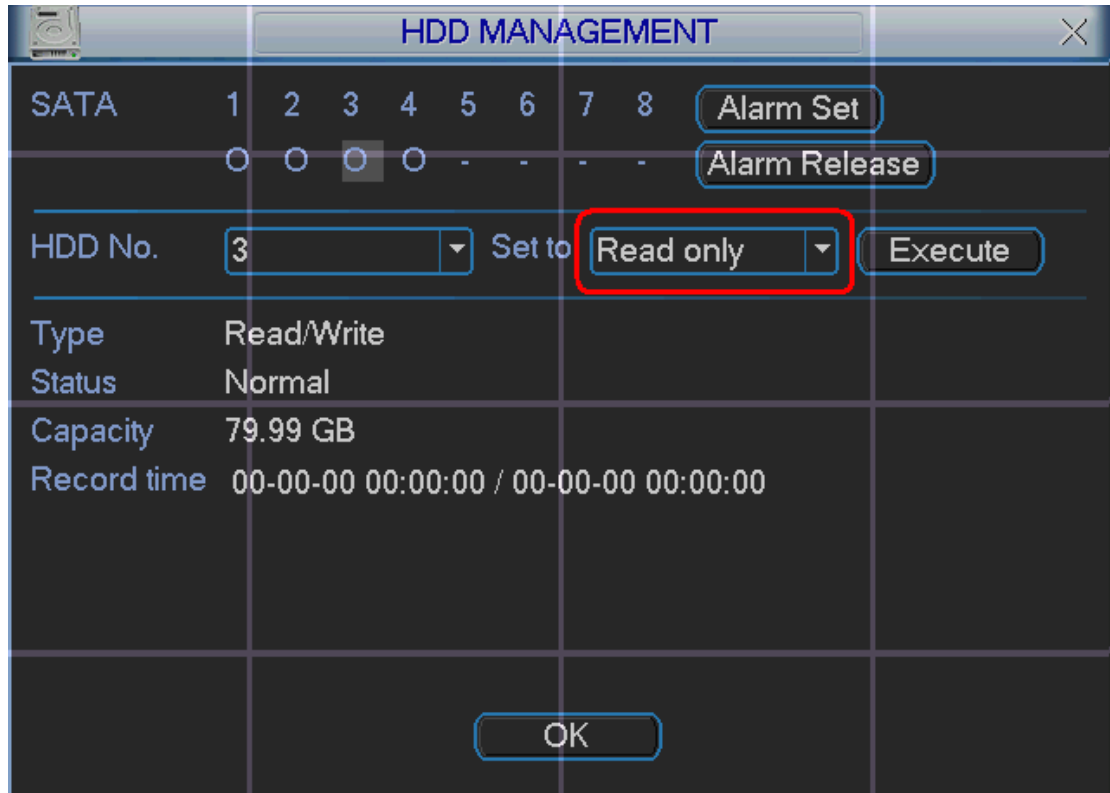

1、 If the DVR have more than 1 HDD, you can set some HDDs to Redundant, (the Redundant according your needs)

A、 E.g.: if you install 6HDDs, you can set
   1 read/write HDD, 5 redundant HDD
   2 read/write HDD, 4 redundant HDD
   3 read/write HDD, 3 redundant HDD
   4 read/write HDD, 2 redundant HDD
   5 read/write HDD, 1 redundant HDD

B、 The Redundant HDD will auto overwrite according first in first out rule

C、 You can not search and view recordings in Redundant HDD, if you want to search and playback it, please set the redundant HDD to Read only

2、 You can choose the wanted cameras do redundant recordings
