

4MP ePoE Starlight+ Network Dome Camera

True Wide Dynamic Range Vari-focal Network Camera with Analytics+

System Overview

The Dahua 4 MP Starlight+ ePoE camera offers Analytics+ functions at the edge – performing complex real-time face capture, people counting, and perimeter protection surveillance. The Dahua Analytics+ algorithms significantly improve accuracy and reliability as compared to standard intelligent features. The camera is ideal for a host of diverse applications — Starlight+, Ultra Wide Dynamic Range, and Smart IR technologies allow the camera to operate in any lighting condition and the IP67 and IK10 rating make the camera suitable for the harshest environments.

Functions

People Counting

The camera uses complex real-time people counting algorithms to deliver accurate flow statistics from two distinct people counting functions, Line Crossing and Regional. The line crossing function counts the number of people crossing a defined line, and the regional function counts the number of people in a distinct, user-defined area. People counting is ideal for measuring the number of customers entering or exiting a location and to monitor groups of people in a distinct location.

Perimeter Protection

Dahua Analytics+ includes Tripwire and Intrusion functions that offer custom tripwires based on object type for automation in limited access areas. Perimeter Protection requires less pixels to detect an object to deliver improved accuracy and decreased false alarms due to lights, weather, trees, or animals.

Smart Motion Detection

Smart Motion Detection, a component of Dahua's Analytics+ technology, improves alarm accuracy and decreases the number of false alarms. The advanced SMD algorithm analyzes a scene for human or vehicle motion, while filtering out other motion due to trees, leaves, animals, weather, and triggers an alarm when detected. SMD also saves time when searching recorded video by filtering false alarms and allowing quick retrieval of an alarm due to a person or vehicle.

- 1/1.8-in. 4 MP Progressive-scan CMOS Sensor
- Triple-stream Encoding
- Smart H.265+ and Smart H.264+ Dual Codec
- 4 MP (2688 x 1520) at 30 fps, 2.7 mm to 12 mm Motorized Lens
- Enhanced Power and Data Transmission Distances (ePoE)
- Starlight+ Technology for Low-light Applications
- Analytics+ Functions Face Detection, Facial Attribute Extraction, People Counting, Perimeter Protection, and Smart Motion Detection
- ArcticPro Series Camera Operational down to -40° C (-40° F)
- IP67 Ingress Protection and IK10 Vandal Resistance
- Ultra Wide Dynamic Range (140 dB) and Day/Night IR Cut Filter
- Maximum IR LED Distance 45 m (147.64 ft)
- Intelligent Video System
- Five-year Warranty*

Enhanced Power over Ethernet (ePoE) Technology

Dahua's innovative ePoE technology offers a plug-and-play solution to transmit power and data over long distances via Ethernet or coaxial cables, reducing installation time and saving money. ePoE technology is a viable, cost-effective solution for extending transmission distances and for converting existing, coax-based analog systems into IP systems. For video security and surveillance installers, ePoE technology saves time and money by reducing overall cabling requirements, allowing for existing coax cable to be used, and minimizing the number of peripheral devices needed. For new installations, ePoE offers the ability to design long-distance applications without the need for additional repeaters.

Starlight Technology

For challenging low-light applications, Dahua's Starlight Ultra-low Light Technology offers best-in-class light sensitivity, capturing color details in low light conditions. The camera uses a set of optical features to balance light throughout the scene, resulting in clear images in dark environments.

ArcticPro

The Dahua ArcticPro Series of extreme-environment cameras combine temperature-tolerant components, a waterproof enclosure, and an integrated heater to ensure flawless operation in temperatures as low as -40° C (-40° F). For applications that demand high-resolution video with advanced features in extremely cold environments, the Dahua ArcticPro Series offers a camera to satisfy the most demanding requirements.

Environmental

The camera complies with an IK10 impact rating making it capable of withstanding the equivalent of 5 kg (11.02 lbs) of force dropped from a height of 40 cm (15.75 in.). Subjected to rigorous dust and water immersion tests and certified to the IP67 Ingress Protection rating makes it suitable for demanding outdoor applications.

Environmental		Analytics+ Functions ²	
Operating Conditions	-40° C to +60° C (-40° F to +140° F), 10% to 95% RH		• Detects human or vehicle violations using the following methods:
Storage Conditions	–40° C to +60° C (–40° F to +140° F), 10% to 95% RH (daily temperature difference within 15° C/59° F)	Perimeter Protection	 Tripwire: a target crosses a defined line. Intrusion: a target enters or exits a defined perimeter. Monitors a combination of detection methods.
Ingress Protection	IP67		 Search and retrieve video based on target type.
Vandal Resistance	IK10		Delivers accurate flow statistics from the following methods:
Construction		People Counting	Line Crossing: counts a person as they cross a threshold in a defined direction. Region: counts the number of people in a defined
Casing	Metal and Plastic		area.
Dimensions	ø159.10 mm x 117.90 mm (6.26 in. x 4.64 in.)		 Counts people simultaneously from four (4) threshold lines and four (4) defined regions³.
Net Weight	0.95 kg (2.09 lb)		 Differentiates between and classifies human and vehicle objects.
Gross Weight	1.20 kg (2.65 lb)	Smart Motion Detection ³	 Filters false alarms due to leaves, lights, animals, and other inconsequential objects.
			 Extracts human or vehicle objects from recorded video for quick target search and retrieval.
			Captures faces from video image and extracts the following facial features:

Intelligent Video System Functions²

Face Detection with

Facial Attribute Extraction

IVS triggers an alarm and takes a defined action for the following events:

Age

Gender

Wearing Glasses Wearing a Mask Facial Hair

Expression (Happy, Calm, Surprise, Sad, Rage)

Standard Features	 Tampering with the camera. Error writing to an onboard Micro SD card. Error sending or receiving data over the network. Unauthorized access to the camera. IP Address Conflict
Premium Features	
Motion	An object moves through any part of the scene.
Missing Object	An object is missing from a designated area.
Abandoned Object	An object is placed in a designated area where no object should be.
Scene Change	A person or object moves the camera to change the scene or covers the camera to obscure the scene.

 The DORI distance is a measure of the general proximity for a specific classification to help pinpoint the right camera for your needs. The DORI distance is calculated based on sensor specifications and lab test results according to EN 62676-4, the standard that defines the criteria for the Detect, Observe, Recognize and Identify classifications.

 The Analytics+ functions and the IVS functions cannot be used at the same time, only one Analytics+ or IVS function can be used at a time. In addition, the Smart H.265+ and the Smart H.264+ Codec cannot be used simultaneously with either an Analytics+ or an IVS feature.

 Pair a Smart Motion Detection camera with a Dahua recording device that also offers SMD functionality to take advantage of SMD alarm filtering and object classification when searching and playing back recorded video.
