Figure 3-2

6

#### Note:

- When using a Dahua device for the first time, user is required to set a login password for the admin account (system default user). The function is Device initialization on APP.
- If you have initialized your device on other platform, choose other connection type to add the camera.
- WiFi config for initialized WiFi Device refer to the Step 6 and Step 7.
  Step 5 Tap "Device Initialization" at the bottom of the screen. Choose your device's connection type. We only take "WiFi Connection" as an example.

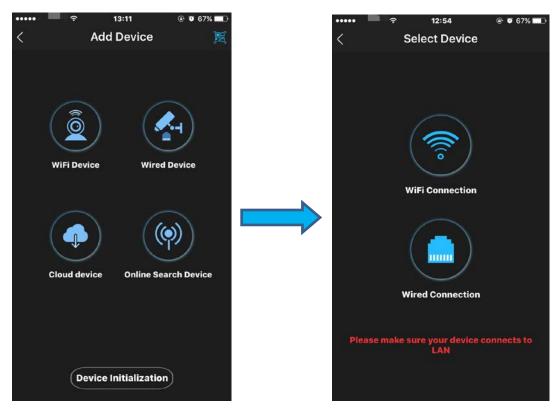

Figure 3-3

Step 6 Scan the QR code on the back of the camera to get the SN, you can also tap "Manually enter the SN" and manually input the SN number on the next page. Then tap "Next".

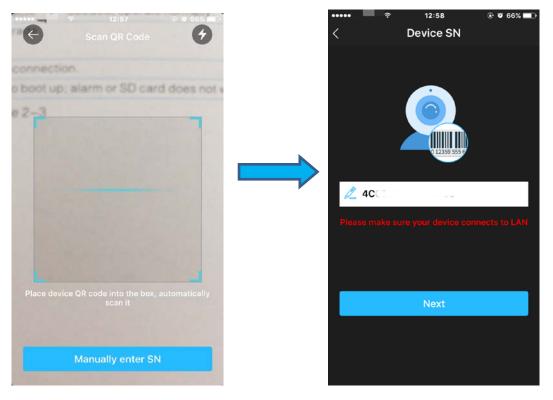

Figure 3-4

<u>Step 7</u> Make sure your smartphone is connected to the same Wi-Fi. Fill in the password of your Wi-Fi, then tap "**Next**".

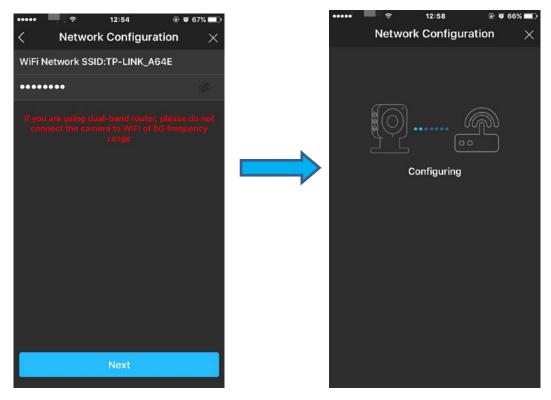

Figure 3-5

Step 8 Set up an account password and security email address that use for reset password for your camera, then tap "OK". Check cloud update config, then tap "OK".

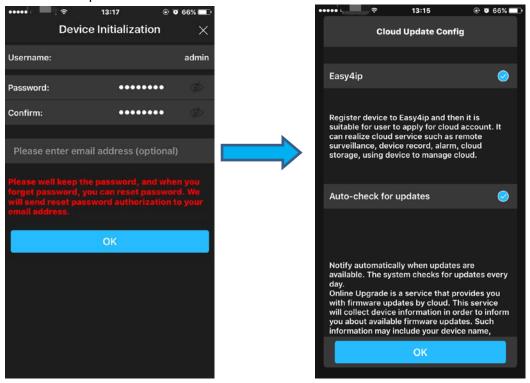

Figure 3-6

Now, you camera have completed the initialization and connected to WiFi Router. Next step is add the initialized device to **DMSS**.

Step 9 Back to "Add Device" page, tap the second option to Add Device.
 Step 10 Input device name and password, your camera is successfully added. You can start live preview now.

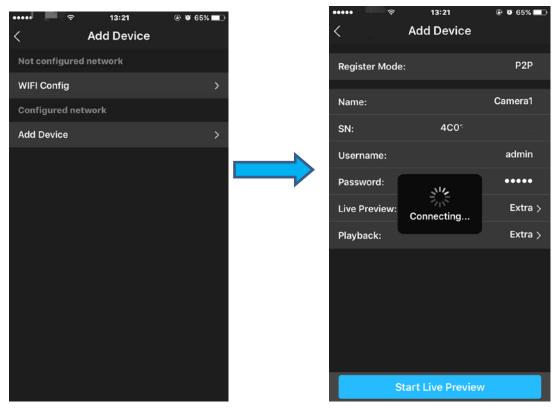

Figure 3-7

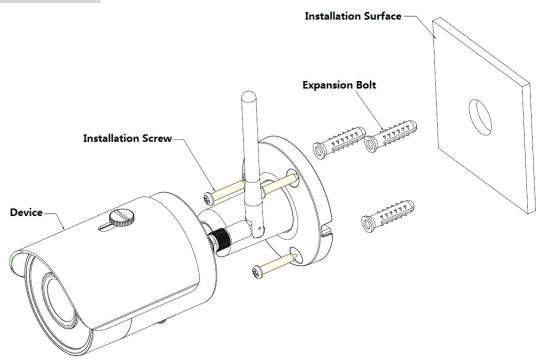

## Note

- If you have more cameras, please follow step 4-10 to add them one by one.
- If you want to change the Wi-Fi signal, please reset the camera to factory default and repeat step 4-10 to add the device

# 4 Device Installation

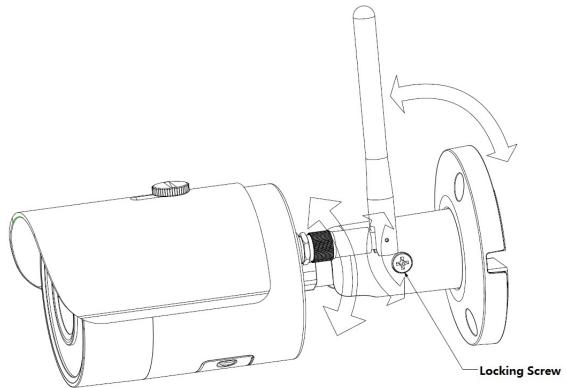

#### Note

Please make sure the installation surface can min support the 3X weight of the camera and the bracket.

- Step 1 Dig holes on the installation surface (wall or ceiling).
- <u>Step 2</u> Open accessories bag, take out expansion bolt and insert it into the hole you just dug.
- <u>Step 3</u> Open accessories bag, take out installation screws. Tighten the screws to fix the device on the installation surface (wall or ceiling). You can move device sunshade back and forth. When you have fixed the device, you must tighten screws on sunshade.
- Step 4 Plug external wiring of the device properly.

- <u>Step 5</u> Use cross screwdriver (in accessories bag) to loosen adjusting screw.
- <u>Step 6</u> Adjust the device in all possible directions, and set its monitoring direction according to the requirements.
- Step 7 Use cross screwdriver to tighten the adjusting screws.
